FILING DATE:	January 14, 1998	:	
TITLE:	Fluoroalkoxybenzylamino Derivatives of Nitrogen Containing Heterocycles	:	

Assistant Commissioner for Patents
Washington, D.C. 20231

Response to Requirement of Restriction and Election of Species

The present paper is in response to the Official Action of March 18, 1999 whereinby the Examiner has requested both restriction of the claims to one of inventions I through V, as classified in the Official Action, and also election of species pursuant to 37 CFR 1.146.

In response and without traverse, Applicant elects the claims of Group V, that is, Nos. 27, 29, and 31 drawn to method of use.

Since Group V (method of use) has been elected, the Examiner has also requested that for search purposes, a single method of use (clinical indication) be designated. In response to the Examiner's request, Applicant designates inflammatory bowel disease.

With respect to Applicant's election under 37 CFR 1.146, it is believed that a more generic claim is allowable, and upon indication of allowability as to the species, Applicant respectfully requests consideration of claim(s) directed to other clinical conditions.

The Examiner is invited to contact the undersigned if any further information is needed. No fee is believed due at this time since response is being made within the 30 day shortened period set by the Office. In the unlikely event that a fee is due, the Patent Office is authorized to charge the Pfizer Deposit Account, No. 16-1445.
